COURSES

Laravel Course

Udemy Course In Laravel (5.8) , Basics In Laravel

Laravel Course

GSG Course In Laravel (8) , Advance In Laravel

MY WORK

Dashboard Using PHP

Develop a control panel for the admin, in which members are controlled as well as everything related to the site from deleting, adding, modifying, and adding sub-admins with some rules .
Link : https://github.com/ahmedhasan689/Dashboard.git

E-Learning Site Using Laravel

An e-learning site that contains many models (user, session, path), and connect them through Eloquent: relationships, and control by controllers to display data .
Link : https://github.com/ahmedhasan689/learn-site.git

E-Commerce Site Using Laravel

Fold a commercial site, allowing users to describe products and categories, and the purchase is made with their financial accounts, and there is a special control panel for the supervisor and sub-administrators to give them full powers on the site with some rules (**under construction**).
Link : https://github.com/ahmedhasan689/E-Commerce-Store.git

Sora Website Using Laravel

Sora.com is a social networking site. In fact, it is my graduation project, in which photos are displayed and interacted with through likes and comments, as well as following System .
